RE: Superior Packaging solutions letter of recommendation.

Starting Hart Food Products was a risky, capital intensive venture. After Mark and Rich met with me and I explained my vision and they decided to share that risk with me and purchased print plates and inventories of laminated film valued at nearly 100 thousand dollars. We had only been in business for two years and had yet to show a profit so I knew I had a true partner in my business. I price check them now and then and they have always been competitive but more importantly Mark has gone the extra mile to make sure we get what we need when we need it. They are extremely well connected to a variety of suppliers and that has been of great help developing multiple products and POS material. I don't give my recommendation to a business or person lightly but Superior Packaging is a wonderful company to work with, a true trading partner.
